Unit 5 Managing Networks Assignment
Unit 5 - Managing Networks. Task A - Network Managers (P1,P3,P4) P1: Network Technologies. Network Operating Systems. As with all computers nowadays, a network based system such as a system used to run a server will also need an operating system. This is where a Network Operating System comes into play. It is essentially an operating system that includes different features which practically turns a computer system into a Local Area Network system, exchanging resources amongst other systems.
