Statistics : an introductory analysis / by Taro Yamane ...

Yamane (1967:886) provides a simplified formula to calculate sample sizes. This formula was used to calculate the sample sizes in Tables 2 and 3 and is shown below. A 95% confidence level and $P=.5$ are assumed for Equation 5. Where n is the sample size, N is the population size, and e is the level of precision. When this formula is
